

MINIMUM DISCLOSURE DOCUMENT & GENERAL INVESTOR REPORT

Peregrine Capital Global Equity Prescient Feeder Fund

31 March 2022

Fund objective

The goal of the Peregrine Capital Global Equity Feeder Fund (the "Fund") is to achieve medium to long term capital growth by predominantly investing in global equity markets.

What does the fund invest in?

The fund is a feeder fund and invests in the Peregrine Capital Global Equity Fund which is managed by Peregrine Capital International. The Peregrine Capital Global Equity Fund invests primarily in global equity and equity-related securities, global debt and debt-related securities. The underlying fund only invest in assets which are permitted by the UCITS Regulations.

Important fund characteristics and risks

The feeder fund is a rand-denominated portfolio offering access to the Peregrine Capital Global Equity Fund without requiring the investor to obtain permission from the South African Reserve Bank or the South African Revenue Service to transfer the funds offshore. The underlying fund managers seek to identify undervalued securities that offer strong upside potential over the medium to longer term. They conduct rigorous research to understand the companies and securities that they invest in to determine their intrinsic value, which allows them to identify opportunities with the best expected returns. The underlying fund managers aim to reduce the risk of permanent capital loss through careful selection of investable securities, and by applying permitted hedging practices.

Who should consider investing in the fund?

The Peregrine Capital Global Equity Prescient Feeder Fund is for you if:

- You intend investing over the medium to long term and have a high-risk appetite
- You seek exposure to diversified international equities that will provide long-term capital growth
- You wish to invest in international assets without having to personally expatriate Rands
- You are comfortable with global stock market and currency fluctuation and risk of capital loss
- You would like to use the Fund as a global equity "building block" in a diversified multi-asset class portfolio

Asset class	Previous quarter	Current quarter
Net equity	94.71%	88.96%
Net fixed income	1.07%	1.10%
Net real estate	2.60%	1.78%
Cash and cash equivalents and other	1.62%	8.16%
Total	100.00%	100.00%

Sector allocation	(%)

Investment strategy and mandate

The Fund is a feeder fund and invests in the Peregrine Capital Global Equity Fund, which is managed by Peregrine Capital International. Peregrine Capital International employs a bottom up stock selection process based on rigorous and disciplined fundamental research, drawing on experience of covering the sectors and companies over many years. Peregrine Capital International focuses its time on building detailed knowledge of specific companies, rather than predicting the economic trends or taking a view on overall markets. The underlying fund mandate is founded on the UCITS principles for a general equity fund, and position sizes are limited per these regulatory restrictions. The fund adhered to the investment policy objectives.

Risk warning

The risks associated with investing in the Fund include, but are not limited to the following: general market risks (such as general movements in interest rates; external factors [war, natural disasters and such like]); changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments and risks related to a specific security (such as the possibility of a company's credit rating being downgraded). Other risks include currency risk. Foreign securities are included in the underlying fund and there may be potential constraints on liquidity and the repatriation of currency, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information. Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

General information

This document is the minimum disclosure document ("MDD") required by Board Notice 92 of 2014 published by the Financial Sector Conduct Authority under the Collective Investment Schemes Control Act, No. 45 of 2002. Collective Investment Schemes should be considered as medium to long-term investments. The value may go down as well as up and past performance is not necessarily a guide to future performance. Collective Investment Schemes are traded at the ruling. A schedule of fees, charges and maximum commissions is available on request from the Manager. Neither the Manager nor Peregrine Capital provides any guarantee either with respect to the capital or the investment performance of the fund. The Manager has the right to close the fund to investments from new investors, and/or to close the fund to new investments, and/or to accept new investments only from certain persons or groups of persons, and/or to limit or suspend the creation and issue of new participatory interests, in each case on such terms as it may determine, if such restrictions will, in the Manager's view, benefit the fund or the effective management thereof or for any other reason whatsoever. Where any forecasts or commentary about the expected future performance of asset classes, or the market in general, are made in this document, please note that neither Peregrine Capital nor Prescient guarantee that such forecasts or commentary will occur.

Calculation of the NAV and price

The value of participatory interests (also referred to as units) is calculated on a net asset value ("NAV") basis. The NAV is the total value of all assets in the fund including any income accruals and less any permissible deductions (which may include audit fees, brokerage, service fees, securities transfer tax and bank charges) for a particular class. The price of participatory interests is calculated by dividing the NAV by the number of participatory interests in issue for that class. The price of participatory interests is published monthly in the MDD, which is available at www.peregrine.co.za.

Investment performance

Performance figures are provided by the Fund Manager. The performance calculated and shown is that of the Fund. Performance has been calculated using net NAV to NAV numbers with income reinvested. The investment performance for each period shown reflects the net return for investors who have been fully invested for that period. Individual investor investment performance may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment of distributions and/or distribution dates, and dividend withholding tax. Where periods of longer than 1 year are used in calculating past performance, certain figures may be annualised. Annualised performance is the average return per year over the period. Actual annual figures and investment performance calculations are available on request from Prescient.

Fee Breakdown

Fund costs	
Service Charge	0.12%
Performance fee	0.00%
Other fees*	0.00%
Total	0.12%

* Other fees includes underlying fees (where applicable), Audit Fees, Custody Fees, Trustee Fees and VAT

An annual management fee of 1.25% and a performance fee of 15% above the hurdle is charged in the underlying fund. A high water mark ("HWM") is applied, which ensures that performance fees will only be charged on new performance. There is no cap on the USD amount of performance fees in the underlying fund.

Total Expense Ratio (TER) and Transaction Costs (TC) (Incl. VAT)

Limitation of liability

This MDD has been compiled for information purposes only and does not take into account the needs or circumstances of any person or constitute advice of any kind. It is not an offer to sell participatory interests or an invitation to invest. The information and opinions in this MDD have been recorded by Prescient and Peregrine Capital in good faith from sources believed to be reliable, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Prescient and Peregrine Capital accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use of this MDD or its contents.

Glossary

Annualised performance: reflects longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period.

Feeder Fund: a unit trust that invests in another single unit trust which charges its own fees and which could result in a higher fee structure for the Feeder Fund.

Maximum drawdown: the largest peak to trough decline during a specific period of investment

Total Expense Ratio: includes the annual service charge, performance fee and administrative costs, but excludes VAT and fund transaction costs, expressed as a percentage of the average monthly value of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

Transaction Costs: are the costs relating to the buying and selling of the fund's underlying assets, expressed as a percentage of the NAV. Transaction costs are a necessary cost in managing the fund and may impact the returns.

Total Investment Charge is the sum of the TER and TC. These should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund and the investment decisions of the fund manager. Since the fund returns are quoted after the deduction of these expenses, the TER and TC should not be deducted again from published returns.
